
Welcome

Sophia Poulos

Welcome to the second edition of the new look ASMA Metrics Matters e-Journal. A special welcome to our first-time readers.

This issue focuses on two important issues: career paths in software measurement and best practices in the software measurement industry.

Mark Exall interviews a veteran in the Software Measurement field - Oliver Hague - to get a better understanding of possible career paths. In *Last Words...*, Arthur Gerozisis tickles our funny bone with a look at what it takes to be a "Metrics person". There are also some tips on achieving CFPS Certification.

In looking at best practices, we look at IBM's achievement of CMMI Level 5 in Australia.

We also get a sneak preview of the Benchmarking standard that is being developed by International Software Benchmarking Group (ISBSG).

Feedback on either the contents or the format of the Metrics Matters e-Journal is always welcome. Please email comments to "The Publisher" on asma@cia.com.au.

Best Regards,

Sophia Poulos
